

Jack Davies

London ◇ jackdavies004@outlook.com

EDUCATION

Bachelor of Computer Science, University of Nottingham

Expected 2026

Average 3rd Year Percentage: 65

Predicted final grade: 2:1

A-Levels

2021-2023

Computer Science: B, Religious Studies: A, Business Studies: A*

Schools

Ashbourne College Kensington

2022-2023

Trinity School of John Whitgift Croydon

2017-2022

SKILLS

Coding Languages: Python, Java, HTML/CSS/JavaScript, C, C++, ARM Assembly

Soft Skills:

- Clear verbal and written communicator.
- High attention to detail.
- Strong critical thinking ability, with a keen eye for nuance.
- Approachable and receptive to feedback.

EXPERIENCE

Intern

July 2025-August 2025

Investec

Bank, City Of London

- Spent 3 weeks interning and getting to know the team.
- Helped with day to day operations and offered a fresh, younger perspective for the team on many different financial matters.

Instructor

2016-2020

Bromley Swimming Club

Bromley, London

- Instructed and taught children how to swim.
- Encouraged and helped children with the potential to pursue the sport competitively.

Landscaping and Gardening

2020-2024

Independent freelance work

Bromley, London

- Maintained and developed gardens and vegetation in the local area.
- Taught and advised clients on maintaining their gardens and local environment.

PROJECTS

Platformer game: I built a game similar to that of Mario in Python for my computer science A Level. Achieved 67/70, going towards 1/5 of my final grade.

Reversi game recreation: I used Java to create a game based on the real game Reversi. This was part of my first year of study and was instrumental in developing my proficiency in Java.

Operating System Process Logger: I developed an operating system process manager in C that concurrently created, managed, and terminated processes using semaphores and the pthreads library. This project strengthened my understanding of concurrency, thread synchronization, and process control, enhancing my ability to write efficient and thread-safe code.

Dissertation (still in progress): I am currently in the process of developing a multiplayer educational game as part of my third-year studies. The game seeks to develop the critical thinking ability of the players and asks how much of the information we receive digitally can be trusted. This is being built in C-sharp in Unity.

Other projects: As of February 2025, my university has tasked our group of 6 with making some bespoke software for the BJSS IT consultancy firm. This is my first official project for another company, and we are on track to deliver the final product on time and with all the features that we planned to add.

EXTRA-CURRICULAR ACTIVITIES AND ABOUT ME

- I swam competitively for 11 years from age 6. I would often train 6-7 times a week for about 2 hours for each session. This allowed me to compete at a regional level, even making some national time. This taught me how to discipline myself at an extreme level.
- I have been on a few expeditions, the most significant being Offa's Dyke, which is an old path of mountains that stretches from Prestatyn, the very north of Wales, to Chepstow in the south. This took us 11 days and demanded resilience to complete. I learned a lot about how teamwork is often essential in solving complex problems within given constraints.
- I am passionate about technology and how it can be used to benefit the world. I have a keen interest in coding and computing, with a high attention to detail and high personal standards for my work. I take pride in my work and often spend extra time perfecting projects to achieve the highest quality.
